

# dbi

design.  
build.  
inspire.

---

**We imagine boldly  
design with intention  
and build with precision**

dbi is a turn-key design and production company shaping cultural venues and live experience settings from concept to completion.

**One vision.**  
**One process.**  
**One team.**

dbi is a turn-key design and production company creating architectural, cultural and live experience environments. We work end-to-end — from concept and spatial design, to technical build-out, audio, video, staging, lighting and full event operation. Our approach unifies creative direction, fabrication and production management into one seamless workflow. This means every project is delivered with clarity, precision and continuity from the first sketch to the final live moment.

Our motto, design-build-inspire, reflects exactly how we work. We design spaces and cultural experiences with intention and identity. We build them with technical excellence and engineering detail pushing the boundaries of what's possible. And we inspire audiences by delivering live experiences that feel otherworldly, unique and contemporary.

We operate both in Greece and internationally, having delivered large-scale cultural and music events across the region — from open-air festivals and concert series to multi-use venue build-outs.

**Our experience in working across borders, coordinating complex logistics, technical systems and artist production, ensures we can take on ambitious projects with confidence and reliability.**

In simple terms: dbi is the partner that can imagine it, build it, and run it. A single team, one vision, end-to-end execution — producing experiences that are cohesive and impactful.
